University Physics Experiment (4) [Paperback]

By BEN SHE.YI MING

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback Pages Number: 139 Language: Simplified Chinese Publisher: Science Press; 1st edition (July 1, 2011). University physics experiments (4) is the general higher education Eleventh Five-Year National planning materials. The book is Chapter 6. Chapter 1 is the spectra and energy levels of the three experiments: atomic emission spectrometry. atomic absorption spectroscopy. Raman spectroscopy; Chapter 2 of the three experiments on the effect of the light field: the magnetic rotation effect. the Zeeman effect. sound optical effects; Chapter 3 of the three experiments on magnetic resonance: NMR. electron spin resonance. optical pumping magnetic resonance; Chapter 4 is on the microwave characteristics of three experiments: space microwave optical properties. microwave Michelson interference and Bragg diffraction. waveguide microwave parameter testing; Chapter 5 nuclear decay and radioactivity of the three experiments: y-ray spectrum measurement. the statistical laws of the nuclear decay 7-ray absorption; Chapter 6 is about solid structures observed experiment: the solid structure of the X-ray diffraction analysis. microscopic observation of the solid morphology. microscopic observation of the solid melting process. College Physics (4) can be used as the textbook of...
