Vintage Publishing, United Kingdom, 2012. Hardback. Book Condition: New. 200 x 132 mm. Language: English . Brand New Book. What can maths tell us about sports? 100 Essential Things You Didn t Know You Didn t Know About Sport sheds light on the mysteries of running, jumping, swimming and points scoring across the whole sporting spectrum. Whether you are a competitor striving to go faster or higher, or an armchair enthusiast wanting to understand more, this is a fascinating read with one hundred short pieces that range across a wide number of sports. Find out: Why high-jumpers use the Fosbury Flop? How fast Usain Bolt can ultimately run and how he could break his records without running any faster? Whether there is a limit to human performance? Who the strongest man or woman is, pound for pound? Why there are so many different scoring systems in sport? If a 100-kilogram mass weighs more in London than it does in Singapore; what the best strategy for taking football penalties is? What the effect of those banned skin-tight swimsuits are? Why golf balls are dimpled? And, last, but not least, why does the bounce of a Superball seem to defy Newton s laws of motion. Written for anyone interested in sport or simple maths, this book will enrich your understanding of sport and enliven your appreciation of maths.
